

# MEPLA

## INFORMATION SHEET

Pursuant to Art. 32 of Reg. (EC) 1907/2006 (REACH)

### **SECTION 1. Identification of the substance/mixture and of the company/undertaking**

#### **Product identification**

Name MEPLA

#### **Relevant identified uses of the substance or mixture and uses advised against**

Description/Use PRODUCTION OF PLASTIC ITEMS

#### **Details of the supplier of the safety data sheet**

Company Name MEPOL SRL  
Address Via John F. Kennedy, n° 7d  
Town and Country 31039 Riese Pio X (TV)  
Italy Tel: +39 0423 746168

e-mail address of the person responsible,  
person responsible for the safety data sheet [tatiana.melato@mepol.com](mailto:tatiana.melato@mepol.com)

Telephone number for information about the product: Tel: +39 0423 746168

### **SECTION 2. Hazard identification**

#### **Classification of the substance or mixture.**

The product is not classified as dangerous pursuant to the provisions of regulation (EC) 1272/2008 (CLP) (as amended). This product is not subject to hazard labelling according to EC Regulation 1272/2008 (CLP) and subsequent amendments and additions.

According to the available data, the product does not contain PBT or vPvB substances in percentage higher than 0.1%.

### **SECTION 3 Composition/information on ingredients.**

The product does not contain substances classified as dangerous pursuant to the provisions of Regulation (EC) 1272/2008 (CLP) (as amended).

## **SECTION 4 First aid measures.**

### **Description of first aid measures.**

Not specifically required. Nevertheless, use of good industrial hygiene practices is recommended.

### **Most important symptoms and effects, both acute and delayed**

The dust produced during handling and processing may be irritating to the respiratory system. When heated, this polymer can release fumes or vapours that are irritating to the eyes, nose, throat and skin. Over-exposure to them can also cause headaches, nausea, breathing difficulties and coughing. Molten or very hot material causes severe burns to skin and unprotected eyes.

## **SECTION 5 Firefighting measures.**

### **Extinguishing media.**

In case of fire, move people away from the area and stay upwind. In case of possible exposure to smoke, vapours or hazardous decomposition products, wear pressurised breathing apparatus with full face protection

#### SUITABLE EXTINGUISHING MEDIA

Traditional fire-extinguishing methods are applicable: carbon dioxide, foam, powder and water spray.

#### UNSUITABLE EXTINGUISHING MEDIA

Don't use water jets. Direct water jet may spread the material or its decomposition products.

### **Special hazards arising from the substance or mixture.**

#### HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Hazardous products may develop in case of fire. See section 8 and 10 for further details.

### **Advice for firefighters.**

#### GENERAL INFORMATION

Cool the containers with water jets to prevent the product from decomposing and potentially harmful substances from developing. Always wear equipment provided with fire-fighting protection devices. Collect fire extinguishing water that must not be discharged into drains. Dispose of the contaminated fire extinguishing water and fire residues according to the standards in force.

#### EQUIPMENT

Wear normal fire-fighting clothes, such as self-contained, open-circuit compressed air breathing apparatus (EN 137), flame resistant clothing (EN469), fire-fighter gloves (EN 659) and boots (HO A29 or A30).

## **SECTION 6 Accidental release measures.**

### **Personal precautions, protective equipment and emergency procedures**

In case of dust dispersed in the air, use protective respiratory equipment. These instructions apply to both staff involved in processing and emergency interventions.

Remove all sources of ignition (cigarettes, flames, sparks, etc.) or heat from the area where the leak occurred. In case of release of molten product, cool before collecting.

### **Environmental precautions.**

Prevent the product from getting into sewer systems, surface water, phreatic zones.

### **Methods and material for containment and cleaning up.**

Collect the leaked product with mechanical equipment and place it in containers for recovery or disposal. Spray water to eliminate residue if there are no contraindications. Ensure adequate ventilation of the area affected by the leak if the product is molten. The disposal of contaminated material must be carried out in accordance with the provisions of point 13.

### **Reference to other sections.**

Any information on personal protection and disposal is provided in sections 8 and 13.

## **SECTION 7 Handling and storage.**

### **Precautions for safe handling.**

Handle the product after having consulted all other sections of this safety data sheet. Dispose of the product responsibly. Avoid creating dust. Do not eat, drink, or smoke during use.

### **Conditions for safe storage, including any incompatibilities.**

Store the product in clearly labelled containers. Store the containers away from any incompatible material; refer to section 10.

## **SECTION 8 Exposure controls/personal protection.**

### **Control parameters.**

While processing the product, dust and other dangerous volatile substances (monomers, carbon oxides) may develop.

In the risk assessment process, it is recommended to consider the occupational exposure limit values foreseen by ACGIH for inert powders not otherwise classified (PNOC respirable fraction: 3 mg/mc; PNOC inhalable fraction: 10 mg/mc). If these limits are exceeded, it is recommended to use a type P filter, the class (1, 2 or 3) of which is chosen based on the result of the risk assessment.

The product contains polymers. The limits of the monomers (ACGIH 2014) are:

#### **Terephthalic acid**

TWA: 10/mg3

#### **Adipic acid**

TWA: 5/mg3

Critical effects: irritation of the upper respiratory tract, neurotoxicity.

### **Exposure controls.**

Comply with the safety standards when handling chemical substances. HAND

PROTECTION

Unless stated otherwise in the chemical risk assessment, not necessary. Wear suitable gloves for processes in which you might come into contact with the molten material.

#### SKIN PROTECTION

Not required.

#### EYE PROTECTION

Not required.

#### RESPIRATORY PROTECTION

We recommend using a type P filter face mask (ref. standard EN 149) or equivalent device, whose class (1, 2 or 3) and the actual need must be defined according to the outcome of the risk assessment.

#### ENVIRONMENTAL EXPOSURE CONTROLS.

The emissions from production processes, including from ventilation equipment, should be controlled with the aim of observing standards on environmental protection.

## **SECTION 9 Physical and chemical properties.**

### **Information on essential physical and chemical properties.**

Appearance	Solid (granules)
Colour	Not available.
Odour	characteristic
Melting point/freezing point.	150 °C
Relative density.	1.25 – 1.50 Kg/l
Solubility(ies)	Not soluble in water.
Auto-ignition temperature	> 450
°C. Decomposition temperature.	> 300 °C

## **SECTION 10 Stability and reactivity.**

### **Reactivity.**

There are no particular risks of reaction with other substances under normal use conditions.

### **Chemical stability.**

The product is stable under normal use and storage conditions.

### **Possibility of hazardous reactions.**

Hazardous reactions under normal use and storage conditions are not predictable.

### **Conditions to avoid.**

Temperatures above 300°C. Beyond this temperature the product decomposes, developing dangerous substances.

### **Incompatible materials.**

Information not available.

### **Hazardous decomposition products**

As a result of decomposition, tetrahydrofuran, carbon monoxide, carbon oxide, carbon dioxide, aldehydes, formaldehyde and other organic vapours may be released.

## **SECTION 11 Toxicological information.**

No episodes of damage to health due to exposure to the product are known. Nevertheless, use of good industrial hygiene practices is recommended.

### **Information on toxicological effects.**

#### **a) Acute toxicity**

According to the classification criteria of Annex I of EC Regulation 1272/2008, and considering the components, the mixture is not classified for this hazard class.

Inhalation: Fine dust and fumes from overheating or combustion can be irritating

#### **b) Skin corrosion/irritation.**

According to the classification criteria of Annex I of EC Regulation 1272/2008, and considering the components, the mixture is not classified for this hazard class.

If the material is hot, its contact with the skin can cause painful burns, redness, swelling and blistering. The cold product should not cause irritation.

#### **c) Serious damage to eyes/eye irritation.**

According to the classification criteria of Annex I of EC Regulation 1272/2008, and considering the components, the mixture is not classified for this hazard class.

If the material is hot, its contact with the eyes can cause burns while the cold product can cause irritation due to the abrasive action of the dust, which can cause scratches on the surface of the eye itself.

#### **d) Respiratory and skin sensitisation.**

According to the classification criteria of Annex I of EC Regulation 1272/2008, and considering the components, the mixture is not classified for this hazard class.

#### **e) Germ cell mutagenicity.**

According to the classification criteria of Annex I of EC Regulation 1272/2008, and considering the components, the mixture is not classified for this hazard class.

#### **f) Carcinogenicity.**

According to the classification criteria of Annex I of EC Regulation 1272/2008, and considering the components, the mixture is not classified for this hazard class.

#### **g) Reproductive toxicity.**

According to the classification criteria of Annex I of EC Regulation 1272/2008, and considering the components, the mixture is not classified for this hazard class.

#### **h) Specific target organ toxicity (STOT) - single exposure.**

According to the classification criteria of Annex I of EC Regulation 1272/2008, and considering the components, the

mixture is not classified for this hazard class.

**i) Specific target organ toxicity (STOT) - repeated exposure.**

According to the classification criteria of Annex I of EC Regulation 1272/2008, and considering the components, the mixture is not classified for this hazard class.

**j) Aspiration hazard.**

According to the classification criteria of Annex I of EC Regulation 1272/2008, and considering the components, the mixture is not classified for this hazard class.

## **SECTION 12 Ecological information.**

Use according to good working practices. Dispose of the product responsibly. Inform the competent authorities in the event the product reaches waterways or sewers or it contaminates soil or vegetation.

**Results of PBT and vPvB assessment.**

According to the available data, the product does not contain PBT or vPvB substances in percentage higher than 0.1%.

## **SECTION 13 Disposal considerations.**

**Waste treatment methods.**

Re-use, if possible. The product residues are considered special non-hazardous waste. The exhaust product must be consigned to an authorised waste disposal company, in compliance with national and local laws. For solid residues consider the possibility of disposal at an authorised landfill.

**CONTAMINATED PACKAGES**

Contaminated packages must be recovered or disposed of in compliance with waste management national standards.

## **SECTION 14 Transport information.**

**UN number.**

Not applicable.

**UN proper shipping name.**

Not applicable.

**Transport hazard class(es).**

Not applicable.

**Packaging group.**

Not applicable.

**Environmental hazards.**

Not applicable.

**Special precautions for users.**

Not applicable.

**Transport in bulk according to Annex II of MARPOL 73/78 and the IBC code.**

Irrelevant information.

**SECTION 15 Regulatory information.**

Safety, health and environmental regulations/legislation specific for the substance or mixture  
Seveso category.None.

Restrictions relating to the product or to the substances contained according to Annex XVII of EC Regulation 1907/2006.

None.

Substances in Candidate List (Art. 59 REACH).None.

Substances subject to authorisation (Annex XIV - REACH).None.

Substances subject to export notification EC Reg. 649/2012:None.

Substances Under the Rotterdam Convention Regulations:None.

Substances Under the Stockholm Convention RegulationsNone.

Healthcare controls.Information not available

**Chemical Safety Assessment**

No chemical safety assessment for the mixture and for the substances it contains has been processed.

**SECTION 16 Other information.**

**KEY:**

- ADR: European agreement concerning the transport of dangerous goods by road
- CAS NUMBER: Chemical Abstract Service Number
- CE50: Concentration that gives effect to 50% of the population tested
- CE NUMBER: ESIS (Existing Substances Information System) Identification Number
- CLP: EC Regulation No.1272/2008
- DNEL: Derived No Effect Level

- EmS: Emergency Schedule
- GHS: Globally Harmonised System of classification and labelling of chemicals
- IATA DGR: Regulations for the transport of dangerous goods by the International Air Transport Association
- IC50: Immobilisation Concentration 50% of the population tested
- IMDG: International maritime code on the transport of dangerous goods
- IMO: International Maritime Organisation
- INDEX NUMBER: Identification number in Annex VI of CLP
- LC50: Lethal Concentration 50%
- LD50: Lethal Dose 50%
- OEL: Occupational Exposure Level
- PBT: Persistent Bioaccumulative and Toxic according to REACH Regulation
- PEC: Predicted Environmental Concentration
- PEL: Predicted Exposure Level
- PNEC: Predicted No Effect Concentration
- REACH: EC Regulation No.1907/2006
- RID: Regulations for the international carriage of dangerous goods by rail
- TLV: Threshold Limit Value
- TLV CEILING: Concentration that should not be exceeded during any time of occupational exposure.
- TWA STEL: Short-term Exposure Limit
- TWA: Time-Weighted Average exposure limit
- VOC: Volatile Organic Compounds
- VPVB: Very Persistent and very Bioaccumulative according to REACH Regulation
- WGK: German water hazard class.
